

Cooper Fellow

LECTURE SERIES

Wednesday, December 6, 2017

3:30 P.M.

Beaux Arts Gallery | Lowe Art Museum | 1301 Stanford Drive

Daniel S. Messinger
Professor of Psychology

Title: *Understanding change:
Timing in the development of infant
emotion, interaction, and autism*

Abstract: The first years of life see the emergence of emotions, language, and social relationships. A dynamic systems perspective suggests that real-time patterns of behavior drive these developments. Guided by this perspective, I explore how new technologies and modeling are revealing the role of interaction in behavioral change.
